This application contains claims directed to the following patentably distinct species of the claimed invention:

first species of Figures 1-8, described on page 6, line 18 – page 22, line 22,  
second species described on page 22, line 23 – page 24, line 19 using the Figure 9 sub-species,  
third species described on page 22, line 23 – page 24, line 19 using the Figure 10 sub-species,  
fourth species described on page 24, line 20 – page 26, line 9,  
fifth species described on page 26, line 10 – page 30, line 1 and  
an in-determinant number of un-illustrated species (modifications of the above species) described on page 30, line 2 – page 32, line 23.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims appear to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

In the event one of the in-determinant number of un-illustrated species (modifications of the first five listed species) described on page 30, line 2 – page 32, line 23 is elected, a proposed drawing correction illustrating it is required in response to this action.

Any inquiry concerning this communication should be directed to John K. Ford at telephone number 571-272-4911.
